DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 ____
that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Hubble, III et al (US 6,384,918).

Regarding claim 1, which is representative of claim 5, Hubble teaches a system for color measurement for a color hard copy apparatus, having a print media transport path, comprising: an illumination source *D1 through D10* adjacent to said path (Col 12 Lines 56-67; Col 13 Lines 1-14); a plurality of photodetectors D12 adjacent to said path (additional detector Col 18 Lines 10-22); and a test pattern 31 on a sheet of media traveling said path 40, the pattern 31 having a geometric configuration such that each of said photodetectors detects substantially discrete regions of said pattern having a single color generated by said apparatus (Col 16 Lines 58-67; Col 17 Lines 1-14).

Considering Claim 2, which is representative of claim 6, Hubble teaches further comprising said photodetectors having predetermined spectral responses (Col 4 Lines 53-57).

Considering Claim 3, which is representative of claim 7, Hubble teaches wherein the illumination source is broadband (Col 2 Lines 4-17).

Regarding Claim 4, which is representative of claim 8, Hubble discloses ___ further comprising a white calibration target mounted within the field of view of all of said sensors (Col 18 Lines 28-40).

Regarding claim 9, Hubble teaches a method for measuring actual color produced by a color hard copy device comprising the steps of: a) illuminating with broad band light, a region of a color test pattern generated by the device, wherein said region has a first color generated by the device (Col 2 Lines 4-17; Col 12 Lines 56-67; Co 13 Lines 1-14); b) discretely sensing actual color characteristics of individual areas of said region (Col 13 Lines 23-48); and c) storing data representatives of said color characteristics (Col 13 Lines 49-57).

Considering claim 10, Hubble teaches comprising the further steps of printing a plurality of intended colors in addition to said first color with said device, and repeating steps a)-c) for each of the plurality of intended colors than said first color (Col 4 Lines 45-57).

Regarding claim 11, Hubble teaches comprising the further steps of: prior to steps a)-c), calibrating each of said sensors using a white calibration target (Col 18 Lines 23-27).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Heather D Gibbs whose telephone number is 703-306-4152. The examiner can normally be reached on M-F 8AM-4PM.

Art Unit: 2622

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward L. Coles can be reached on 703-305-4712. The fax phone number for the organization where this application or proceeding is assignedis 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
